

AWTOS, the Automatic Water Turn-Off System, includes two proprietary smart home devices and an app from Orion180 Technologies. It protects your clients' homes by proactively detecting leaks and automatically turning off water flow.

Key Talking Points

- Orion180 policyholders get the AWTOS Turn-Off Valve **AT NO COST** (Market Value \$499).
- We'll also **remove the non-weather water damage sublimit**, and plumbing-system based exclusions – that's how much we believe in AWTOS.
- Policyholders get a **10% premium discount – up to \$150** – on their first renewal after purchasing AWTOS, once installation has been verified.

Most importantly, your clients get peace of mind.

Non-weather water damage costs U.S. homeowners over \$20 billion annually, and it can take months to fully recover. With their policy, you help protect them from worst case scenarios. With AWTOS, you can help prevent those scenarios.

How AWTOS Prevents Costly Damage

AWTOS Turn-Off Valve

Installs on the main water line to automatically stop water flow during a detected emergency.

Wireless Leak Sensors

Designed for early leak detection in key areas like water heaters, washing machines, and below sinks.

The AWTOS App

24/7 leak detection, real-time alerts, remote turn-off control, and more – right from the AWTOS app.

Pricing & Subscription

Orion180 Policyholder Price:

The AWTOS Turn-Off Valve is offered at no cost, exclusive to Orion180 policyholders. The optional AWTOS Sensors are available as low as **\$20 each** with orders of 5 or more.

AWTOS Monitoring Service:

AWTOS Monitoring Service through the app is **\$10 per month**. For most clients, this is more than offset by the premium discount upon renewal.

Important Note:

Installation must be completed by a licensed plumber, and the cost is borne by the policyholder. **Proof of installation is required.**

Where to Find in MY180

AWTOS is integrated in the MY180 quoting portal as an add-on.

For existing policies, AWTOS is listed under the Savings & Smart Home Add Ons panel.

Mobile App Features

The AWTOS mobile app gives insureds visibility and control from anywhere:

1. Monitor water temperature, pressure, flow rate, total water consumption, and valve status.
2. When a leak is detected, the system automatically shuts off your water and the app sends you an alert.
3. Access historical data.
4. Set additional alarms for high water usage, pressure changes, and temperature fluctuations.
5. Group sharing available.
6. Quick and simple setup via your home's Wi-Fi network.

What Agents Need to Know About AWTOS Installation

Once an AWTOS (Automatic Water Turn-Off System) order is placed, the policyholder will receive a follow-up email requesting key installation details. ***This step is required to complete the order.*** The insured has **30 days** to provide required information, starting from the later of the purchase date or the policy effective date.

Here's what the policyholder will be asked to provide:

- 1 Main Water Line Pipe Size**
The AWTOS device currently supports pipe sizes ranging from 0.5" and 1.5". The policyholder must confirm the size of their main water line to ensure compatibility.
- 2 Wi-Fi Signal Strength**
A strong and consistent Wi-Fi signal at the installation location is required. This allows the AWTOS device to connect to the AWTOS Cloud, enabling remote control and real-time alerts.
- 3 Electrical Outlet Availability**
The AWTOS device requires power to operate correctly. They must indicate whether there is a standard electrical outlet near the main water shut-off valve.
- 4 Indoor Installation Site**
AWTOS must be installed in an interior location.

Coverage updates and applicable discounts are applied after proof of installation is approved and the AWTOS App is connected and activated.
